
Fibre Optic Checklist for Tenants

Ask these questions when looking for Fibre connected office space.

www.chrisandadam.ca

Checklist:

- Which buildings have fibre optic broadband in my market?
- Is the fibre optic plug and go-ready in each suite within the building?
- If you need an on-premise server room, is it fibre-ready?
- What is the downtime (breaks in service) for the location?
- Who are the service provider(s)?
- Does the building allow for two memberships with different service providers in order to avoid dependency on just one?
- Is there a fibre connection to accommodate a wide area network that will handle services such as a directory, a VoIP system or private data services accessed by multiple offices?
- What are the monthly costs for different fibre speeds and usage? Are there redundant fibre lines from different access points?
- Are there multiple fibre pathways into the building?
